### **Project**

Two-level QR code for private message sharing and document authentication  
This project presents a new rich QR code with two storage levels that can Be used for document authentication. QR code has public and private storage levels. The public is readable by any classical QR code application. The private level is constructed by replacing the blank modules with specific textured **patterns**.

### **Online Spare Parts**

Allows providing spare parts and services through online platforms. The real power of the project is in creating relationships with customers and delivering a high level of services and support
